REPUBLIC OF ESTONIA
MINISTRY OF ECONOMIC AFFAIRS
AND COMMUNICATIONS

INVITED SPEAKERS & POLICY MAKERS

Themes of preparedness in providing national security through technologies of sourcing defence, energy, and rescue. Uniting Baltic Sea Coastal States for Enhanced Defence and Resilience.

PARTICIPANTS

REGISTER AS EXHIBITOR

Julius von Freytag-Loringhoven
Head of Baltic States,
Friedrich Naumann Foundation for Freedom

Hanno Pevkur
Minister of Defence of Estonia

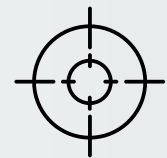

Harald Krepmpchen
Dean of Tallinn Defence Attaches Association

Expo themes

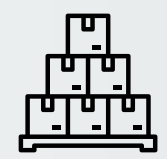

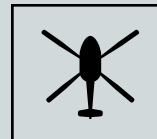

Rescue

- A.** Learn about rapid response systems, mobile **medical units**, and advanced life-support technologies designed to save lives in critical situations. **Rescue**

Defence

- B.** **Air-Land-Sea-Space** technology providers are expected to present at the unique venue, open to the sea; neighboring to large indoor showrooms, and paved outdoor areas. **Defence**

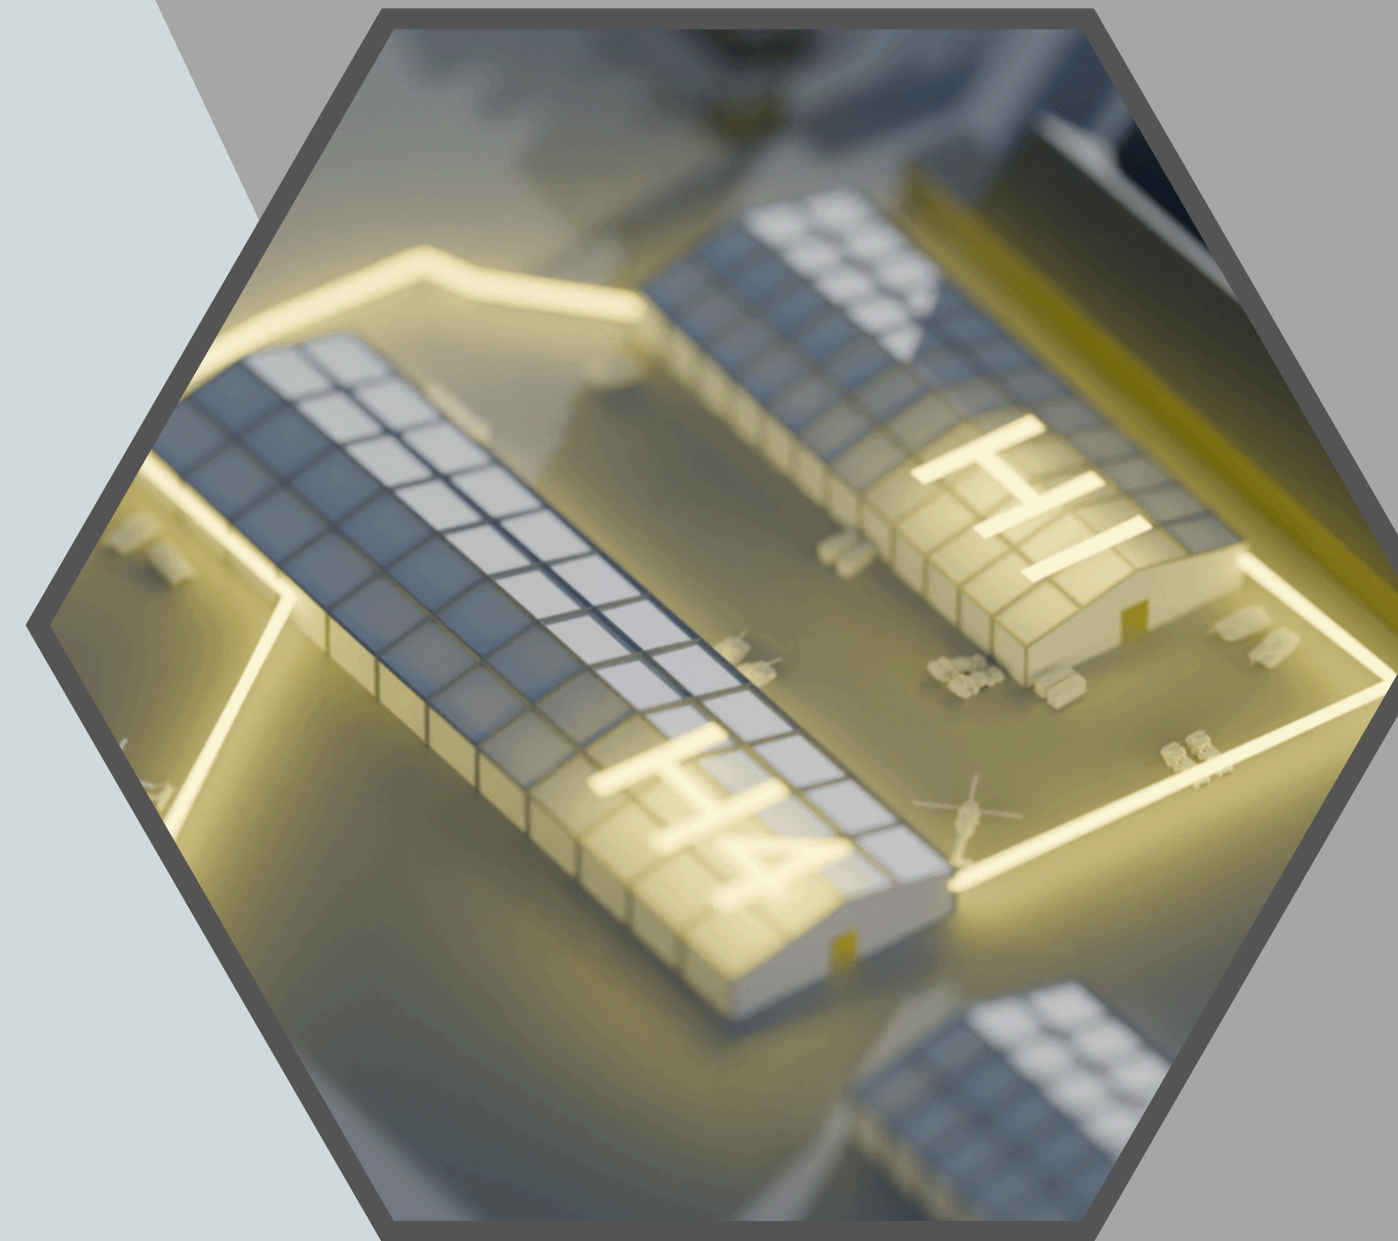

Sourcing

- C.** Share experiences on sourcing the defence technologies; find collaboration partners for combining volumes for bigger, regional **procurement projects** **Sourcing**

Energy Infra

- D.** Mobile solutions for **energy production** at the time of crisis. Risk mitigation in our era, focusing on protecting on-land and undersea infrastructures, technologies to detect attacks **Energy**

REGISTER AS EXHIBITOR

WHY PARTICIPATE?

Collaborative Problem Solving

Engage in discussions with lawyers, officials, and experts to develop strategies for managing crises and staying in control during unexpected situations.

Strategic Alignment

Align with top suppliers and partners to handle crises efficiently, establishing clear communication lines and responsibilities.

Regulatory Preparedness

Prepare for future challenges by understanding rights and restrictions for moving critical resources across borders.

Network with Professionals

Connect with entrepreneurs, suppliers, and decision-makers for valuable relationships.

Showcase Your Innovations

Present your products to government representatives and procurement specialists.

Regional opportunities

Gain insights from experts on crisis management, defence, rescue energy, and sourcing technologies.

With a mission to create a more secured world - DefSecIntel Solutions' combat-proven products are redefining the landscape of border security and defence.

The systems are purpose-built for different missions: We are developing and manufacturing mobile autonomous combat-proven surveillance systems and C-UAS with AI-assisted technology. Solutions, equipped with a variety of sensors and integrated UAVs, providing wide-range, all-weather, day and night surveillance with AI-powered technology, are designed mainly for border security, defence and critical infrastructure protection.

Decision of the Government of the Republic of Estonia to strengthen crisis preparedness

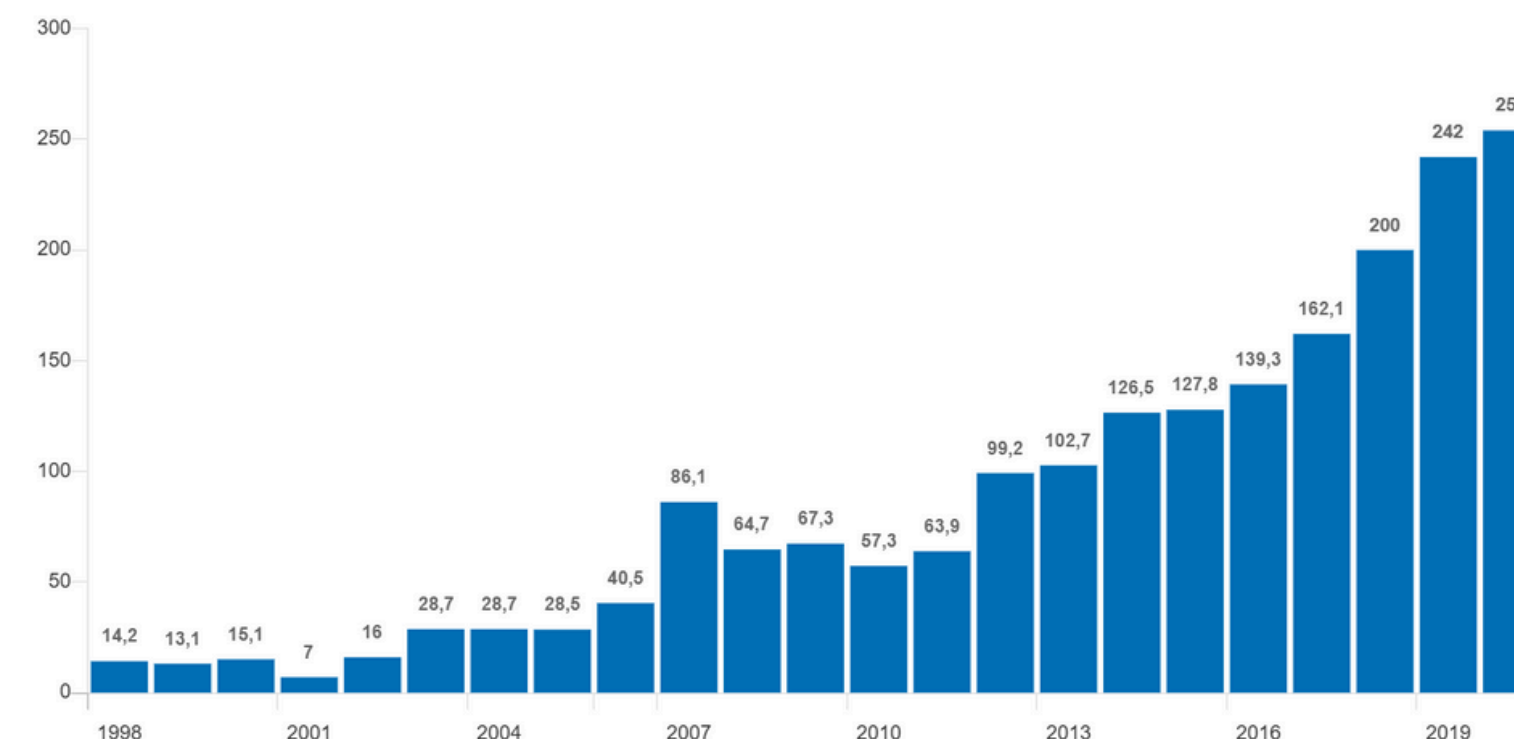

The war in Ukraine confirms that Estonia can be defended if we have the will, the weapons, people with training, and the necessary reserves. The war in Ukraine is not over, but it is already clear that Estonia's national defence decisions have been the right ones – the Ukrainian experience has only served to confirm the need for and importance of planned capabilities. On the basis of the National Defence Development Plan approved last year, decisions were taken to prioritise the development of capabilities ensuring that the increase in military defence would be as fast as possible and with the greatest impact.

In connection with the concentration of Russian Federation forces along the border with Ukraine and the tightening of the security situation, the Defence Forces and the Ministry of Defence prepared an analysis and made proposals to the Government of the Republic to initiate the necessary actions to strengthen crisis preparedness. As a result, the Government of the Republic decided in January 2022 to allocate an additional EUR 339.5 million to the Ministry of Defence to strengthen crisis preparedness for the period of 2022–2025. Most of this money will be used to procure ammunition and build the infrastructure necessary to store it.

In response to the Russian military aggression in Ukraine, the Government of the Republic did approve on 24 March 2022 a reinforcement package for Estonia's military defence in the total amount of EUR 476.77 million, with EUR 15.44 million being allocated with the 2022 supplementary budget and EUR 461.33 million remaining in the period of 2023–2025. Additional funds were allocated to six areas: deploying short-range air defence systems, upgrading anti-tank capabilities, improving indirect fire capabilities, increasing situational awareness, building additional infrastructure to host allies, and, for the Defence League, creating greater opportunities for volunteers to participate in territorial defence. This package will ensure that brigades will be able to destroy more of their opponents than today, and it will be significantly easier to destroy the first enemy assault echelon. Enemy units entering Estonian territory would be under constant and very dangerous fire. In dark conditions, the ability to destroy and demoralise the enemy will be much greater than it is today. Conducting an air and naval offensive against an adversary will have catastrophic consequences for the adversary. The enemy's second echelon, infrastructure, command, control, fire support, and logistics will be at risk at a distance of 50–90 km.

Volume of Procurements | million euros per year

* Until 2021, the funds allocated from the State Budget as defence expenditure have been presented. 2022 is based on the current budget.

2% GDP supports a sustainable and balanced development of national defence

As of 2012 there has been an agreement between the political parties of the government to support and maintain the defence budget at a 2% GDP expenditure.

Military expenditures represent approximately 4.5% of the total state budget. This is one of the smallest items in the budget. This guarantees the defence expenditure to be maintained at 2% of the gross domestic product supporting a sustainable and balanced development of national defence.

About Supply Security & Defence Expo 2025

SSD 2025 is the premier defence and security expo in the region, bringing together top-tier experts, innovators, and decision-makers to address the challenges of modern defence and supply chain security. With the support of government and industry leaders, we provide a platform for showcasing cutting-edge technologies, forging strategic partnerships, and advancing the defence ecosystem.

Organized by Exponaut, a leader in high-profile event management, SupplySecurity.eu reflects our commitment to fostering collaboration and innovation in critical sectors. Whether you're here to exhibit, network, or learn, SupplySecurity.eu is your gateway to the future of defence and security. Join us as we shape the strategies and technologies that will define tomorrow's secure supply chains.

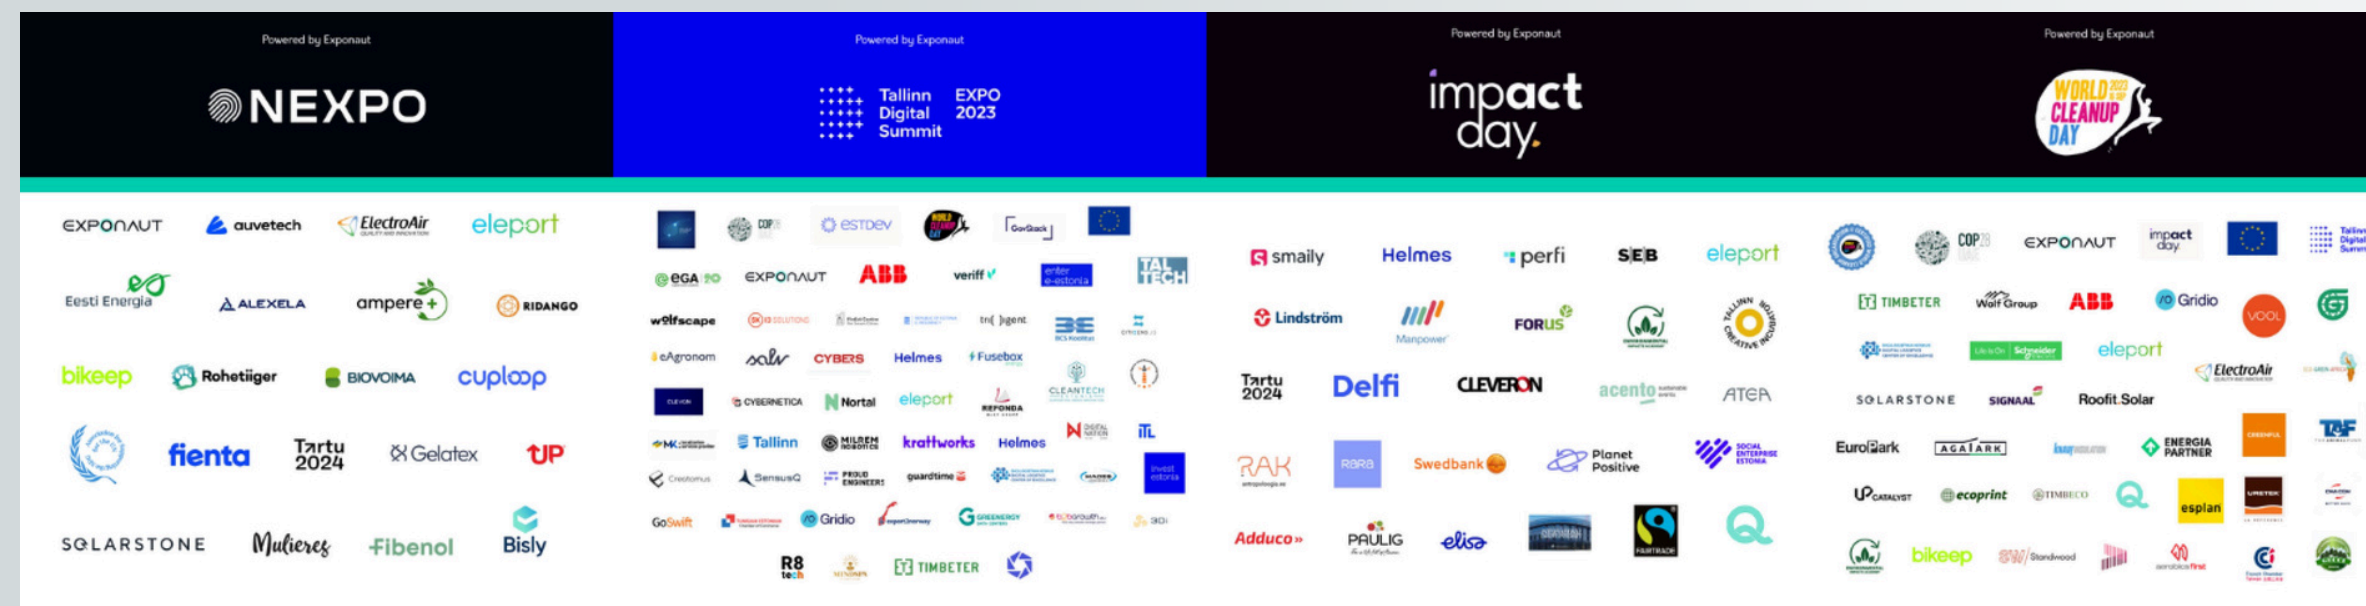

At Exponaut, we specialize in creating world-class events that make an impact. With a proven track record of organizing high-level gatherings like the **Opinion Festival**, **AIM Congress** (Abu Dhabi official partner), **World CleanUp Day**, **Tallinn Digital Summit**, **Greentech Week Estonia**, and the **eCarExpo** (our own flagship event), we bring expertise, creativity, and precision to every project.

Our dedication to excellence has earned the trust of governments, industry leaders, and innovators worldwide. Leveraging years of experience, Exponaut is proud to start initiatives like the Supply Security expo - a landmark event addressing the critical intersections of defence, security, and innovation.

Driven by a passion for connection and progress, we don't just organize events - we build ecosystems that inspire collaboration and drive meaningful change.
